SOLUTION BRIEF

CrowdStrike and HYPR

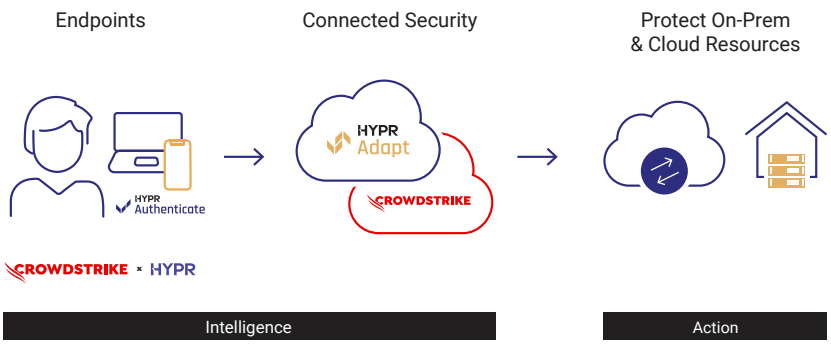
Unify identity and device risk intelligence from the CrowdStrike Falcon® platform with your identity workflows to stop identity threats in real time

In an environment dominated by remote work and cloud-based resources, adopting a Zero Trust security model becomes essential. Your workforce requires secure, seamless access to applications and resources anytime, anywhere, on any device. However, endpoint device data and user risk signals often remain disconnected from identity workflows and broader security systems.

The HYPR | CrowdStrike Integration

Eliminate Gaps Between Intelligence and Action

HYPR unifies real-time endpoint device data and identity threat intelligence from the CrowdStrike Falcon® platform with HYPR's advanced access controls and your Identity Provider's workflows to prevent unauthorized access. HYPR enforces adaptive identity access policies based on changing device and identity posture from the Falcon platform, including CrowdStrike Falcon® Zero Trust Assessment (ZTA) risk scores, along with identity provider data, web and browser risk signals from HYPR Adapt. Teams gain unparalleled visibility and control over user access to safeguard your business end-to-end.



HYPR | CrowdStrike Solution Key Benefits

- Give trusted users fast, secure passwordless access
- Extend and enhance identity threat detection and response (ITDR) capabilities
- Leverage Falcon identity and endpoint risk intelligence, along with identity provider data, web and browser risk collected by HYPR, to enforce access decisions
- Integrate identity verification as a core component of your security posture
- Apply predefined CrowdStrike policies or customize rules to align with your needs and current conditions

Solution Features and Benefits

Combine User and Endpoint Intelligence
Leverage Falcon ZTA risk scores and CrowdStrike Falcon® Identity Protection telemetry to inform policy decisions within HYPR Adapt. Enforce access policies based on the current security posture of users and devices for real-time adaptive protection.

Dynamically Enforce Access Decisions
Dynamically assess identity and device risk and automatically control access to critical systems, applications and data to boost security responsiveness and accuracy. Ensure user login attempts originate from secure devices with high Falcon ZTA scores, instantly adjusting access controls when thresholds are not met. Control measures include requiring additional authentication steps, verifying identity, or restricting access to certain applications until the risk is mitigated.

Eliminate Passwords While Improving Authentication Experience
Remove passwords and other shared secrets from your authentication processes with frictionless, FIDO Certified MFA from HYPR. Protect your systems and resources from credential-based attacks while making login faster and easier for your users. HYPR works across devices, platforms and IdPs, providing a unified, consistent login experience that streamlines operations and enhances productivity.

Tailor Security Controls
Use our pre-defined, out-of-the-box CrowdStrike policies, or easily customize and adjust these policies through the HYPR Control Center admin console. Modify score thresholds on a per use case or global basis, based on your organization's unique requirements and evolving conditions in your environment, ensuring flexible and relevant security management.

About HYPR

HYPR creates trust in the identity lifecycle. HYPR Identity Assurance provides the strongest end-to-end identity security for your workforce and customers, combining phishing-resistant passwordless authentication with adaptive risk mitigation, automated identity verification and a simple, intuitive user experience. HYPR's solutions have been independently validated to return a 324% ROI.

About CrowdStrike

CrowdStrike (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
